2019/4411/P	Sanya Polescuk on behalf of Belsize Society	22/10/2019 23:35:59	OBJ	The proposal reduces the size of the garden to a small strip of unbuilt land between raised basement/terrace extension and the boundary and amounts to overdevelopment. In addition, the proposed structural support of the rear openings encroaches into the height of the openings and alters the shown rear elevation layout significantly in comparison to that shown. The proposed pair of new doors on the front facade, supposedly in keeping with traditional garage doors, appear squat and badly proportioned.
