Subject: RE: Planning alerts system - a couple of comments on the web application

Hi Planning Camden
I was looking at this application:

Application number: 2019/5351/T = Application type: Application for Works to Tree(s) covered by a TPO

I think this tree trimming needs to be done – so no problem with the application, I support it. (I live a few doors away)

Comment one:

If you look at the dates associated with application 2019/5351/T you'll see that:

Application Registered 22-10-2019

Comments Until 21-10-2019

The 'comments until' date is BEFORE the 'application registered' date which means that the 'add comments here' link does not appear. Not really a problem with this application but logically the situation should never arise in the first place and the web application should stop that sort of thing.

Comments two:

The link given at the bottom of the email in the sentence "Please [give feedback](#) to help us improve this service." does not work.

Generally speaking the planning alerts system works well.

Thanks for your help

Peter McGinty
