Subject: Support for works to tree 2019/5351/T

Dear Camden Council,

I support planning application number: 2019/5351/T = Application for Works to Tree(s) covered by a TPO.

I am particularly in favour of works to the Norway maple (label as T1 on this planning application) as it is a forest tree and although it is on communal land it is very close to my property.

This Norway maple is very problematic as it grows very rapidly and is increasingly becoming too big for its location.

Furthermore, it makes a LOT of seedlings. I spend a lot of time every spring and summer in an attempt to hand pull all of them from my garden. Also nothing grows under it. I have also Heard that these trees have shallow roots and are prone to be blown down. This worries me profoundly as it is very close to my house (it is towering over my roof) and others properties. I wonder whether the Council would not consider getting rid of this Norway Maple in question and replacing it with a more appropriate tree for this location.

Thank you,
Ms Branco
