Subject: Planning application objection - URGENT

Your ref 2019/4468/P

Dear Sirs

The above planning application I can see has been submitted
I only know this because it is the house next door and the owners informed me today.
I have received no letter advising of the proposed development or have we been given a chance to raise any objections
This development will impact on our property in a large way, and I wish to raise objections to it, the roof is a garden terrace, and if No 4 is allowed to build another floor, it will both block light and totally change the aspect of what we see from the terrace, we will be living with a high wall to one side and it will impact the feel and the value of our house.

I can not see on your website, how I raise this objection, so I revert to e mail

Yours sincerely

Peter & Sarah Greane
