

Application No. 2019/4604/P

Sui Generis 1 bed residential tower unit (Fire Station, Lancaster Grove)

The currently submitted, amended proposals appear to do little to improve the facility of the internal living spaces of this unit but do provide for a 19.6m. square 'private' outdoor terrace on the roof of the tower.

The use of such a facility would create a potential noise hazard for local residents and an increased oversight from views at this height, including play facilities at Sarum Hall School.

What is deemed 'private' for the would-be resident of the unit would thereby be an intrusion into the 'privacy' space of others living in the vicinity.

I wish to object to this new use of the building.

Application No. 2019/4796/L

Concomitant internal/external alterations to the above proposals for the tower unit (Fire Station, Lancaster Grove).

The proposed, structural changes would seem to further diminish the character and integrity of this building's utilitarian and industrial history.

A balustrade would only be required if the roof level was to become an outdoor terrace.

I wish to object to these proposed changes.

With thanks, Jane Butler.
