

PRODUCT AND COMPANY IDENTIFICATION

PRODUCT NAME: Pro-Living® Wildflower Plug Plants - Elephant Park

COMPANY: Proteus Industrial Technologies Ltd, 21a Sirdar Road, Brook Road Industrial Estate,
Rayleigh, Essex SS6 7XF, United Kingdom

EMERGENCY CONTACT NUMBER: +44 (0)1268 777871

DESCRIPTION

Proteus wildflower plug mixture is suitable for planting into Proteus Bio-Diverse engineered substrates of Pro-Living® green roof schemes, proposed for Elephant Park (note, subject to availability of specific plugs at time of order).

PREPARATION

Create or construct a suitable growing bed that is free of weeds, has reasonable texture and structure and can retain moisture. A depth of 75 -150mm or more is best for supporting the widest range of plant species. Shallow depths (less than 75mm) are not adequate and growing mediums other than Proteus Bio-Diverse Substrate may not contain sufficient moisture or nutrients.

PLANTING

Plugs are best planted in the autumn or spring but can be sown at other times of the year if there is sufficient warmth and moisture. Irrigation may be needed to maintain establishment through dry periods. Thoroughly water after installation.

AFTERCARE

The requirement for aftercare will vary from scheme to scheme.

Please see separate Elephant Park site maintenance plan enclosed.

TECHNICAL DATA

Latin Name	Common Name
Anthyllis Vulneraria	Kidney Vetch
Leucanthemum Vulgare	Oxeye Daisy
Lotus Corniculatus	Birdsfoot Trefoil
Ranunculus Bulbosus	Bulbous Buttercup
