Subject: Ludham undercroft

We were amazed to learn that the planning application for the Mosaic School was lodged last month. As you know this residents' association is strongly opposed to the part of the plan which moves the rubbish bins for Ludham into the open and turning the valuable open space of Lismore Circus with its green gym and kids playground, into a rubbish dump. We believe this will have detrimental effect on community safety and hence should be of urgent concern to your project. Note: we are not opposed to the rest of the plans for the Undercroft.

We met with the architects to discuss these our objections are concerned to find that we are listed in the application as a group which was consulted. As no mention is made of our strong objections, the implication is that we are in support, or at least some notice was taken of what we said. I have cc'd the Camden staff who are listed as consultees or contacts so they are aware of our concerns.

In the planning application, the Mosaic School gives two options for handling the refuse from Ludham estate. Presumably this is an attempt to get the planning permission through without dealing with the controversial issue. As there are no specific plans for all the rubbish bins moved

from the Undercroft, it is difficult to object to them. I attach the comments from the police who, as far as they are able to with no specifics, warn about the rubbish.
