2019/4569/P	Dennis Huang	02/11/2019 09:47:31	COMMNT	Regarding planning application 2019/4569/P :- I am concerned about the outlet vents at the front of the house shown on the plan, as the fumes from these vents would come into my house through my front windows/front door. For health reasons, if they could be repositioned so that the hot fumes from the washer/dryer & oily fumes from the kitchen can not enter my house.
