Subject: Conjestion on the underground at Swiss Cottage station 100 Avenue Road - Submission of revisions to the CMP

How do you propose to ease conjestion on the jubilee line at peak times with this development now approved and under way ?building a new tube station is not going to increase carriage capacity

My commute is already unbearable as a partially sighted person having to wait for two to three crowded trains just so I can embark

Are these things even taken into consideration ?

Please respond
