**Subject:** Objection to Proposal 2017/6638/CMP

Dear Mr Coltrini,

We object to the CMP Proposal 2017/6638/CMP due to the following key reasons to mention a few:

- The Nitrogen Dioxide levels in this area are already far and above the EU limit. An additional increase in NO2 levels is detrimental to human health.
- By utilizing the area as suggested Swiss cottage is deprived of its only green area in the area and there are no alternative areas nearby for children to play and grown-ups to relax. Effecting all users in a most negative way.
- It will severely increase the already high noise level and additional vibrations will occur.

Please acknowledge receipt of our objection.

Thank you.

Regards,

Margit Wedberg
