Subject: 2017/6638/CMP - Karen

As a local resident and mother of two school age children I object to the new CMP proposals because:

- The Nitrogen Dioxide (NO₂) levels in Swiss Cottage Open Space are already 63% above the EU limit [Imperial College. Oct 2019].
- The increased pollution from 25 construction lorries, including 11 massive 54ft articulated lorries per day, through Swiss Cottage Open Space for 2 years will inevitably negatively effect the health of all those using it, especially by the public path and children's play area right next to the hoardings. Whilst the majority of vehicles are supposed to be ULEZ* compliant, this currently only amounts to an estimated 29% reduction in NO₂ emissions. [Mayoral press release 21/10/19].
- 25 (including 11 x 54ft articulated) lorries will cause additional noise and vibration much too close to the public path and children's play area as well as schools in.
- Winchester Road care home, Mora Burnet House, will suffer increased disturbance and pollution due to the increase in construction vehicles.
