Details of the pre-application advice received

The creation of the entrance on the side elevation and associated gate within the garden wall is mostly acceptable. The side elevation is a less significant part of the building and the proposed entrance is located within an existing window opening with the sill dropped. The gate leading from the garden wall is also an acceptable alteration as this is a typical arrangement within the area. All doors should be painted timber and should match the host building and conservation area in character and appearance. The alterations to the plan form at ground floor level are generally acceptable as they involve the removal of later partitions. A new partition is erected in the secondary front room to accommodate a hallway leading from the new entrance, it would be great if this could be designed to allow the historic plan form to still be understood – this could possibly be achieved through glazing. The creation of a useable space at basement level is acceptable in principal, however the new stairs leading from the principal room at ground floor would be resisted. The Council would like the historic staircase to be retained and if a secondary staircase is required, for this to be located in a less historically sensitive part of the building. The plans show that
