Unit	sq.metres

5. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

Replacement and re-configuration of the existing timber framed shopfront. The front entrance lobby effectively forms the common parts of the shop and flat and as such forms the final part of the means of escape from the residential parts above. Following a visit by the London Fire and Rescue Service, the Applicant has agreed to upgrade the vertical separation between shop and the lobby forming the means of escape from the flat (there is only one entrance to the flat). The fire separation needs to be 60 minutes. We have investigated upgrading the existing construction, but we cannot achieve a rating of more than 30 minutes, which is not acceptable to the Fire Service. The Applicant therefore applies to relocate the shop entrance into the street facade of the existing shop front and block off the existing side internal entrance with 60 minute construction timber stud wall. It is not considered feasible that the existing shopfront could be retained and altered to incorporate a new entrance door, so a new matching shopfront is proposed. This would incorporate a new shop entrance door of timber and partially glazed with some minor reconfiguration of the shopfront glazing and stall riser. The reconfiguration would maintain the existing appearance as much as possible and as indicated on the attached drawings.

5. Description of the Proposal
