2019/4741/P	S Johnston	11/11/2019 13:00:56	OBJ	<p>This proposal is great in principle, but bad in specifics. Whilst true that it will be a bonus to make use of this space, it is unacceptable that doing so results in substantial harm to the local environment. The solution to move the estate's rubbish collection to eurobins outside of the estate (and into the public space of Lismore Circus and surrounding areas) is unacceptable. Open bins of rubbish are an eyesore and a health and safety hazard. Bins tend to attract more garbage - and the result will be an avenue of rubbish and fly-tipping.</p> <p>The local community strong recommends a re-think on the material change to the rubbish collection of the Ludham estate before this application is approved. Turning the community open spaces into avenues of eurobins and unsightly rubbish is NOT A GOOD SOLUTION. The Mosaic School feel strongly they should not have to work surrounded by rubbish. We the community are sympathetic, but strongly feel that their proposal to make use of this space should not result in material harm to the open spaces of the wider community. (This community has enough to contend with without more flytipping and other eyesores)</p>

2019/4741/P	Robert Zagar and Sarah Allen	11/11/2019 21:05:56	COMMENT	<p>My wife and I [REDACTED] are in support of the expansion of of the mosaic school and all it can offer to the area. What we strongly object to are the plans to relocate the rubbish disposal outside the buildings into areas used by children and the general public. Our personal experience was when bins were put out at the end of Elaine Grove while building works took place on the estate. Rubbish was piled up, thrown over the railings, constantly spilling out onto the pavement, where rats were frequently seen. It also became a site for regular fly tipping. Another solution must be found to prevent this area from becoming one large outside rubbish tip.</p>
