Ref. 2019/5348/P. Planning application

Dear Sirs,

As regular visitors and walkers to this area we wish to comment on the above plan which has come to our notice. Whilst aesthetically very unusual in it's design ,quite stand out in green frontage would be out of place in a road filled with largely red brick Victorian and other buildings .The digging of a basement could cause subsidence to adjoining buildings in such a hillside. The disruption on this road used as a rat run during rush hours too ,for such a long period of construction ,would be considerable. We trust you will consider all the points. Thanking you.
