Attention Ben Farrant

Planning Application 2019/5348/P 18a Frogna! Gardens NW3

It seems totally wrong that such a short time is being given for objections, details have just come on the Camden website and a notice has just appeared on the adjacent lamppost. The period for objection should be extended.

This proposed house if built, would totally dominate this part of Frogna! Gardens. It is far too large and overwhelming and out of proportion with the neighbouring houses. It is an ugly lump of a building with little aesthetic merit and totally unsuitable for this conservation area.

The building of this proposed house with yet another basement will cause significant disturbance to a considerable number of people. Parking in Frogna! Gardens is already at a premium. The number of contractors' vehicles that this would generate is going to make an already difficult situation impossible for us all.

We strongly object to this unsuitable proposal.
