2019/5716/T	Hampstead CAAC	29/11/2019 21:59:54	OBJ	<p>Insufficient information. No statement or reasons given for this proposal. HCCAAC is extremely disappointed in the cumulative loss of so many mature trees in private gardens in the last 2 decades or more. The degree of loss and impact on the CAs and the beneficial green environment is now well recorded. In many applications tree felling is not justified rather than owners' maintenance, and approvals are sometimes granted without the requisite tree and necessary Arboricultural reports. Where such reports are submitted, closer scrutiny is often required to challenge them and push for a better outcome, ie. retention. HCAAC would like to see two replacements for each tree felled, and that the replacements should be as closely as possible comparable in size and maturity to trees lost. HCAAC notes that trees plus all greenery and shrubs, provide the setting to our Conservation Area, and act as an essential attractive feature, and must be preserved for the next generations.</p>
