Importance: High

Good morning,

I have just been made aware of the above planning application, which I as the most affected property knew nothing about. Likewise I was not notified about the change in fenestration arrangement which I would have objected strongly to as well – as this is right up against my bedroom and study windows.

This has been the method of the owner/developer of Upper Park road 2 for three years, trying to get changes that are very detrimental to the properties next to them approved behind our backs – again and again. This is incredibly stressful.

Best regards
