2019/6074/T	James Pickard	09/12/2019 16:37:50	OBJ	This is a beautiful, healthy and mature Silver Birch tree that will be at least 40 years old and is an important contributor to the mature landscape of this lovely housing estate. This tree also makes an excellent contribution towards reducing CO2 and pollution levels locally. The TPO should be used to protect this tree which is not in front of any significant windows. We should be planting more trees not destroying perfectly good existing ones.
2019/6074/T	Jonathan Byatt	06/12/2019 11:29:09	SUPC	Can this shrub/tree be recycled and removed firvtrandfer to another location within Camden? This would preserve the plant and allow a low cost option for Camden council gardening contractors to improve estates and other areas e.g. south end close estate. In this way air quality is improved as well as the quality of life at the transferred location
