Dear Sir,

re 32 Bartholomew Villas NW1

The following tree works are planned for the reasons explained

- ① Strawberry Tree at front. Resting a fence and lifting wall attached to face. Lesser weight of tree leaning to the west by removal of one branch in that direction namely the bottom branch in front of the window approx 4 inches diameter
- ② Bay at rear. Reduce height and growth to East by 1 metre. (Just to control size & shade.)
- ③ Magnolia grandifolia trim back from neighbour's upstairs patio to prevent overhang, then reduce top of tree by shortening outstanding branches by 1 metre. (Again to keep tree's size and roots manageable).

Your response is much appreciated, thank you. Warm Christmas Wishes Faithfully
