

16/12/2019

MR + MRS Clark

I am writing to object to the planning application at <sup>1</sup> Dunollie Rd NWS 2XN Application number 2019/5649/P.

I believe this building would be a disaster for our road. It would certainly look out of place with all the other houses on the road.

Since this is a Conservation area I believe it will Spoil our lovely road. There is also a possibility of trees having to be removed and affecting the local nature.

Parking in the area is already quite difficult. With garages being demolished this can only mean more ~~garages~~ street parking being needed.

This amount of building will certainly take a year or more. It is a big job especially with the basement being dug out. The noise is going to be unbearable. My bedroom looks out onto this property.

The vehicles that will be needed to remove Concrete and debris while the building is going on will be immense. Large trucks to remove all the Concrete for the basement.

There will have to be parking Suspensions for all the trucks and vans delivering materials and removing materials.

My Partner has disabilities and has a disability Car this could effect his life greatly and not for the better.

I believe the noise all this building will generate on such a peaceful road will impact our Community in a very negative way.

I know everybody is quite unhappy and worried about what will happen. Hopefully our worries and fears will be taken into consideration.

The thought of kangos drilling all day to dig out a basement is horrendous.

Yours Sincerely
