Reason: for the avoidance of doubt and in the interest of proper planning.

Informative(s):

1 Reason for granting approval

Within the planning permission of the substantially completed development (originally approved under 2012/6858/P dated 31/03/2015 and subsequently amended under 2015/3900/P and 2015/6939/P) the approved basement venue space includes a number of areas labelled 'structural void'. These areas are constructed floorspace in situ (they have a floor, ceiling and walls) but no use was allocated to them under the previous permissions as it was not clear at the time whether they were needed for anything more than service runs. Now that the development is near completion, a tenant for the basement venue space has been identified and they wish to have areas currently labelled as 'structural void' at lower ground and mezzanine level to be opened up and used in association with the approved basement venue use. The quantum of floorspace involved is 369sqm.

No additional floorspace is proposed and the consented 'structural void' space would be used for venue purposes, in accordance with the approved floorspace around it (which already totals 2,895sqm). The proposal is considered to be non-material. No further impacts are likely to result, and the event space is covered by a range of planning conditions and legal obligations.

Government guidance states that there is no statutory definition of 'non-material'. The National Planning Practice Guidance (NPPG) makes it clear that this is because whether changes are non-material is dependent on the context of the overall scheme. The subject scheme is a large major development providing a new urban block with a 2,895sqm new subterranean event space; 6,213sqm A1-A4 space; 4,308sqm office space; a new hotel and 23 residential units. It involves the demolition of a number of buildings, the construction of two large buildings (A and B) and alterations to dozens of existing buildings (both listed and unlisted).

Overall, in the context of the approved scheme, the minor changes proposed are not considered to make a material difference to the approved scheme.

2 You are advised that this decision relates only to the changes set out above and within the submitted documents and shall only be read in the context of the substantive permission granted on 31/03/2015 under reference number 2012/6858/P and is bound by all the conditions and legal obligations attached to that permission.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraph 38 of the National Planning Policy Framework 2019.

Yours faithfully
