Dear Ham,

22 LANCASTER GROVE - CIVIL & STRUCTURAL APPOINTMENT

We write with regard to the proposed works at the above site, involving the construction of a new single occupancy domestic residence.

We are able to confirm that we are employed as Chartered Consulting Engineers, designing the permanent structures for the works, and are appointed to the completion of the shell and core works under ACE normal services'. This includes inspecting critical elements of the works during our site visits to monitor quality, compliance with the design, answer technical queries, dealing with any exposed unknowns, etc.

As always, contractually the responsibility to build in accordance with our designs remains with the main contractor.

The contractor is responsible for all temporary works, limiting movement in line with the requirements and ensuring a safe working environment. The contractor will be required to appoint a suitably qualified, experienced and insured Temporary Works Engineer to complete the design of the temporary works, and to monitor the install on site, including any required adaptations during the works.

As part of our appointment, Constructure will review and comment on the temporary works design and sequencing, RAMS, etc, prior to their implementation.

Yours sincerely
for Constructure Ltd

Paul Hosford MEng CEng MStructE
