2019/5835/P	Jonathan Byatt	09/01/2020 09:09:14	SUPC	<p>Can the owner developer please work with Camden and it's gardening contractors to assess which plants shrubs and trees impacted by this change can be recycled. In this way the flora and fauna which help to reduce pollution and improve the general environment can be recycled to another Camden location. For example, Southend Close estate- which has recently had several trees planted in celebration of the Camden centennial - can be improved and the lives of the residents enhanced by by adding plants, bushes, shrubs or the like. This ensures that healthy plants are not merely destroyed but are recycled and reused at little or no cost by Camden to improve the general environment of the borough. Due to the nature of these works and construction traffic this small consideration in reducing pollution will help to reduce the carbon footprint of the Works.</p>
