2019/6266/P	Jonathan Byatt	07/01/2020 13:42:38	SUPC	Whilst generally supportive of improvements to properties which enhance the general environment comma could the owner developer please work with Camden gardening contractors to determine if there is an opportunity to recycle plants disturbed by this application. It is entirely possible many plants shrubs or trees will be destroyed in this process. There is an opportunity to recycle these plants and reuse them on other areas under Camden stewardship such as housing estates, parks or other areas. For example, the recent addition of trees to South end Close has enhanced the general environment and help to reduce pollution levels for the future. This is state and others like it would be happy beneficiaries and keen to receive any plants common shrubs or trees which are displaced rather than seeing them destroyed and Pulped merely for fertiliser.
