Informative(s):

- 1 Levita House is part of the Ossulston Estate built to the designs of the LCC Architects' department in 1930-31. It is described as "the most important inner city estate of the inter-war period, representing the most considered attempt by the LCC to inject new thinking into inner city housing estates". It was influenced in particular by Viennese housing models and was innovative in terms of layout and elevation. The Estate is grade-II-listed but is not in a conservation area. It is of four storeys with an attic storey with dormer windows. The ground floor has concrete blockwork at ground floor level and rendered brickwork above. The hipped roofs are covered in pantiles and have tall chimney stacks.

The applicant wishes to use metal railings and a gate to secure a small unsupervisable area behind a bin store. The railings have been designed to match original railings in the vicinity, and a similar installation has been granted consent on the opposite side of the courtyard.

Any works other than those specifically mentioned in the consented documents are unauthorised. If further works are found to be needed, the permission of the council's conservation team must be obtained in writing, or further listed building consent may be required.

The proposed works will not harm the special interest of the grade-II-listed building.

The application has been advertised in the press and by means of a site notice, whereby there were no consultation responses. The site's planning history has been taken into account in making this decision.

Special attention has been paid to the desirability of preserving the special interest of the listed building, under s.16 of the Listed Buildings and Conservation Areas Act 1990 as amended by the Enterprise and Regulatory
