Finish:	Black
Dimensions:	610mm (2ft)
Sensor:	Photo electric cell switch
Lumens:	1650 per metre
watts:	14.4w per metre
colour temperature:	3000k Warm White
additional information:	Full CE certification and ROHS compliant
Warranty:	5 year

Colour temperature 3000k (warm white)

“This is one of the latest LED Mini sign lights which is jam packed full of new ideas and innovative design.

As expected, the new sleek and stylish 45mm casing is one of the slimmest available in the UK with integral drivers.

Behind this sign light mini’s 90° magnifying lens the superb 1650 lumen 14.4W per metre LEDs deliver a punch to sign facias and an unrivalled performance of even illumination.

The new Multi bracket is double slotted and has a chamber allowing the fitter to orientate the back plate fixing position from horizontal to vertical overcoming any fixing problems in an instant.

Multi bracket gives cold fingers a break from spanners with a clever and unique spring clip fixing captive in the channel at the rear of the sign light.

The clip slides and springs over a retaining nipple on the bracket fixing. This simple but innovative idea offers the fitter the fastest and most versatile fixing installation available over any trough light in the UK.

300mm Multi Brackets will give a coverage of up to 1.2m.

Smart new cast end caps with rear entry cable glands tidy and conceal unsightly cables from view.

Longer runs of this sign light are quickly formed. An IP68 connector is concealed within a new cast aluminium chamber and sits comfortably in step grommet allowing cables to easily and freely pass through.

The sign light has been independently tested and certified by the Lighting Industry Association laboratories with certificates readily available upon request.”
