2019/6222/P	Jonathan Byatt	10/01/2020 17:57:08	OBJ	<p>Owner developer please provide an environmental impact documents to accompany this application? On two fronts there is likely to be a large impact to a sensitive va area. The Works themselves will likely entail significant works traffic and this needs to be investigated based on the traffic usage of this sensitive area being so close to Camden Town and Primrose Hill. Any offsets for the increased carbon footprints of these works with then need to be assessed and any equivalency provided. The second part would be the destruction of existing flora and fauna at the site. Could the owner developer work with Camden gardening contractors to assess which plants could be recycled and reused or recycled at other locations such as Camden Estates Gardens or parks. In this way the pollution absorbing nature of the plants could be retained without a simple destruction being required. This will also be a low-cost solution for Camden.</p>
