2020/0182/T	Darla Hocking	21/01/2020 13:32:43	COMMNT	<p>I am a resident on Glenilla Road. Other London Plane trees have been removed in the last several months. This is excessive. I really can't see that there are any safely reasons to have it removed.</p> <p>My opinion is there is no reasonable justification to have it removed.</p>
2020/0182/T	Darla Hocking	21/01/2020 13:32:49	COMMNT	<p>I am a resident on Glenilla Road. Other London Plane trees have been removed in the last several months. This is excessive. 2020/0182/T	Marcela	21/01/2020 13:41:41	COMMNT	<p>Completely against!</p> <p>First and foremost, the immediate effect and noticeable change that is observed when trees are cut down is the loss of visual attractiveness of the land. green overview of the area is lost and the place loses its beauty. Secondly, when trees are cut down, the soil is left bare. The remaining part of the tree dries up and the roots no longer hold the soil together.</p> <p>Tirth, it's a loss of biodiversity. There are animals that live in that tree.</p> <p>In Short: Trees are essential in the water cycle. And they give us out oxygen, they maintain the ecological balance!!!!</p>
2020/0182/T	Angeline Moura	21/01/2020 13:48:38	PETITNSUP P	<p>I currently live in Belize park. I strongly believe that we should preserve our beautiful trees in our area. Please do not cut any tree. Consider carefully that our children love these. This is why Belize park as charm. Plus it helps to clear the air..</p>
2020/0182/T	Sylvaine	21/01/2020 13:37:43	COMMNT	<p>Please save the tree. The tree is over 10 meters away from the building, is over 100 years old and an asset to the neighbourhood. Thanks!</p>
2020/0182/T	Kathia Rossi	21/01/2020 13:29:41	OBJ	<p>As a resident at 16 Belsize Park Gardens, I strongly object to this. The damage to the building is not proven and the tree is at least 10 meters away from the building which makes me wonder how the rest of the neighbourhood is still standing!</p> <p>The report on the cracks mentions slight cracks, nothing major. We all know houses in London that are 140 years might have some cracks. Foundations are good.</p> <p>Moreover, even if there was a damage, there are a lot of alternative solutions which do not result in ruining the belsize park environment.</p> <p>Cutting the tree would be a disaster to the wonderful green environment of Belsize Park and does not make any sense in 2020 when we know how trees are essential for pur environment.</p>

2020/0182/T	Julien Rossi	21/01/2020 13:19:11	OBJ	I strongly object to any tree being removed in this beautiful neighbourhood. The tree described in this application is one of the oldest and one of the largest plane trees in the neighbourhood. It separates houses in a nice way and allows the inhabitants to have a little privacy. The damage that the tree allegedly causes to 16 Belsize Park Gardens appears negligible and I believe other solutions should be found to deal with the appearance of slight cracking at number 16 Belsize Park Gardens. Cracks frequently occur in London houses as a large chunk of London's real estate is built on clay. Removing trees should never be the default option and I am convinced that other much more benign options can be found. I have never heard of 100 year old trees being removed in Belsize Park and I certainly hope that the council will continue to work to preserve this beautiful environment.
2020/0182/T	Darla Hocking	21/01/2020 13:32:46	COMMNT	I am a resident on Glenilla Road. Other London Plane trees have been removed in the last several months. This is excessive. I really can't see that there are any safely reasons to have it removed. My opinion is there is no reasonable justification to have it removed.
