Objection To The Planning Application Consultation
- Erection Of Single Storey Rear Extension
at 142 Bayham Street

Dear Mr Josh Lawlor,

I Mrs J Kelly

would like to object to the proposed rear extension to 142 Bayham Street.

The reasons are as below,

- ① Loss of light to habitable rooms including the kitchen, bathroom and bedroom.
- ② Loss of light to the garden which is below the level of my house (140).
- ③ When the houses were built I in 140 they took the light from my garden and left me with extra walls surrounding my garden.
They took away the light by building these houses.
- ④ The houses are out of character in Bayham Street, this extension is further exacerbating the problem.
- ⑤ 140 is surrounded by walls already and this extension would add to it.

⑥ This will be a disaster and an outrage to Mrs Price. She already has an extension on one side so she should not have another extension on the other side.

⑦ Mrs Price and whoever comes after her will see three large walls outside her back windows. This will further block her light + sunlight. She will not have any view, she will be surrounded by three walls. They will always have to live with these walls and no natural light.

We all need more natural light, especially living in a congested area in Camden Town, with so much traffic and pollution.

We urge you not to give permission to this ~~at~~ extension and strongly oppose it.

Yours sincerely
