- Highly vandal resistant - undentable with superior build quality.
- Lockers are fully recyclable
- Available with a number of locking options
- Direct from stock

Available in 3 heights

450mm , 600mm or 900mm

eXtreme[®]
Plastic Lockers

The eXtreme range is available in three heights, all with the same base size, so they can be stacked and nested to efficiently fill any space.

The modular design acts in the same way as bricks in a wall with the resulting column being far stronger than a single unit ever could.

Each unit has a profiled top and corresponding recessed base, allowing the lockers to be easily stacked and combined with a range of accessories including sloping tops. Whilst the lockers are not pre-drilled for fixing they are manufactured with specially marked fixing points enabling the lockers to be securely fastened together using the provided corrosion resistant nuts & bolts.

Corporate version

Vented door lockers

Combining the features and benefits from eXtreme Plastic Lockers®, this corporate version eXtreme Plastic locker with vented door provides 2 air vents on 450mm and 600mm high and 3 air vents on 900mm high locker door, allowing extra air flows for the lockers.

Your **COLOURS**, your **CHOICE**

We can produce relatively small runs (minimum order approximately 100 units) of custom coloured, textured or patterned lockers to match your brand colours.

Rapid Response

These lockers are manufactured using a slightly different process (in the UK) which means we can respond to your order very quickly and begin production almost immediately.

Unique Features

Why choose eXtreme plastic lockers

Weather resistant

This locker was designed from the ground up to withstand the harshest of environments.

Super Tough

The eXtreme lockers are constructed from hard wearing polyethylene - unlike steel lockers eXtreme are undentable making them highly vandal resistant.

The doors have a maximum opening angle of 90 degrees enabling adjacent lockers to be accessed without obstruction. In order for this to be successful the eXtreme locker has a special industry leading hinge which can withstand over 250Kg of force.

Secure

As standard, eXtreme lockers come fitted with a unique RD4 cam with its special shape and 3mm thick cam bar. **That's industry leading security as standard.**

The superior build quality ensures all door nibs are correctly aligned with the recessed grooves and are the correct length. Unlike other plastic lockers eXtreme are designed to resist thieves.

Hygienic

For hygiene, the lockers have been designed with small drainage holes allowing for hygienic washdowns with a high pressure hose. Perfect for environments where cleanliness is critical.

Lock Types

Key lock or swivel catch as standard

Key lock

The key / cam lock comes with two keys and has 4000 differs. The eXtreme key is thicker than standard minimising the risk of snapping.

Master keys are available to enable an authorised person access to all compartments if required.

Management keys simplify key management - no more keeping lists of key numbers and re-ordering keys, simply use the management key to replace the whole barrel.

Swivel catch

The swivel catch acts a handle and can be easily padlocked with a standard or combination padlock. The shackle bar of the padlock should be between 5 - 7mm.

Standard keyed padlocks and combination padlocks are available.

Coin return

The coin return lock works with a coin and comes with two keys as standard, suitable for wet areas.

Master keys are available to enable an authorised person to access all compartments if required. Other currencies compatible locks are available on request.

Coin retain with cash box key

The coin retain lock works with a coin and comes with two keys as standard, suitable for wet areas.

Master keys are available to enable an authorised person to access all compartments if required. Other currencies compatible locks are available on request. (Not suitable for corporate version)

Electronic & RFID locks

We offer a range of innovative, flexible & user friendly alternatives to traditional locking systems including combination, combination + air, or RFID - compatible with – ISO14443, ISO 15693 & Legic RF.

Combination

Programmable combination lock with a code finder and master override key. Available in black or white.

eXtreme Locker Accessories

Success Stories

Keys Family Day School (California)

Keys Family Day School searched high & low to find a quality locker durable enough to be placed outside in the intense California sunshine before discovering the eXtreme Plastic Locker. They would like to provide outdoor lockers for their students to store their sport kits and equipment - weather and vandal resistant eXtreme Plastic Lockers are the perfect solution.

120 x 600mm high eXtreme Plastic lockers with sloping tops were installed by the school outside in semi sheltered locations.

The school were simply ecstatic about the lockers.

"We researched every plastic locker available in the U.S. and we found that Extreme Lockers fit our needs hands down. Our lockers are out in the elements here in CA. they are exposed to direct sunlight, rain and a variety of temps. Sturdy construction, great looks, graffiti proof and easy to clean. Love love love them."

Success Stories

Bird's Bush Primary School

Bird's Bush Primary school were using the Summer break to undertake some needed renovation work and wanted a flexible cloakroom solution that would match the new colourful layout.

195 eXtreme Plastic Lockers were installed in small banks, spread around the school.

By stacking the 450mm lockers in columns of either 3 or 4, the school was able to maximise storage space whilst ensuring that pupils in each area could safely reach every compartment.

The sloping tops prevent the accumulation of litter and clutter so the lockers will stay clean and fresh for a long time.

“Bright, colourful and strong. Perfect for kids... These lockers can be placed 3 high or 4 high which is perfect for the different age / height groups we have.”

Success Stories

Box Hill School

Box Hill co-educational boarding and day school is a small independent school, set in a beautiful location with a mix of classic architecture & modern buildings.

With a substantial amount of building work going on around the school, they needed a flexible locker solution which would not interfere with the renovation work.

160 x 900mm high plastic lockers were installed in sheltered spots around the school. Once all construction has been completed the lockers will be relocated to more permanent locations.

“Excellent! Installation team was great. Quick, confident, no fuss. Everything installed on time with no hassle. Afterwards everything was left clean & tidy.”

Success Stories

Fowey & Salcombe Harbours

The Royal National Lifeboat Institution (RNLI) needed to install two blocks of life jacket lockers as part of an initiative to encourage the use of life jackets when coming into harbour.

Now boat owners can wear the lifejackets as they sail into the harbour and store them safely and conveniently the moment they reach shore.

24 eXtreme Plastic Lockers were installed at Fowey and Salcombe harbours using a custom built secured frame to ensure the lockers could withstand the harsh coastal environment.

With security & weather resistance being of paramount importance, the eXtreme Plastic Lockers really was the only possible choice!

“We are delighted with the response from boat users to the Lifejacket Lockers Initiative.

The lockers in both locations are in constant use...”

Pip Hare
