

Mini Bikehangar

The Mini Bikehangar is a smaller version of our popular Bikehangar, offering secure parking for up to four bicycles.

Designed and manufactured by Cyclehoop, the Mini Bikehangar offers a secure solution to long-term cycle parking and an effective way to protect bikes from tough weather conditions and vandalism.

The Mini Bikehangar stores four bicycles within less than half of a standard car parking bay, making it a great alternative to our standard Bikehangar when installing in areas where space is limited.

This compact design is made from galvanised mild steel and is fitted with a gas sprung door for easy access, as well as perforated side panels for extra security.

Our Bikehangar illustrates secure cycle parking standards in the TFL London Cycle Parking Design Standards manual.

Specification

- Galvanised sheet steel
- Perforated side panels
- High density cycle racks with locking bars
- Corrosion resistant, tamper proof lock
- Vandal resistant door catch
- Gas assisted door
- Standard colour; Green RAL 6009, optional powder coating available
- Adjustable feet to suit the camber of the road
