Hello Warren,

I would say that planning permission is required for the units. Yes, I think the best course of action would be to retrospectively apply for planning permission. You can do so here

Hello

I am a business owner, leasing the second and top floors at 30-32 Neal Street, WC2H9PS from the retail unit below which is Schuh.

We moved in here in February, 2004. We installed several air-conditioning outdoor units on the roof of this address before we moved in. Our landlord at that time was Footlocker UK.

23. Pre-application Advice

Our building is being purchased by another company and the facilities person from that company has requested that we show them proof of planning permission for our air-conditioning unit install.

We didn't get planning permission, because we were informed that planning permission was not required. Some of our air-con units are on a ledge, alongside those that belong to the retail unit below us, Schuh, and some are situated on the roof of this building, behind a low wall that screen them visually and acoustically from their surroundings.

We did carry out a noise assessment as requested at the time but unfortunately don't have the written results to that to hand as our builder dealt with all of this for us, and the company is no longer in business.

I have checked with the manufacturer and installer of our air-con units and they inform me that they comply with all current legislation in terms of gas and refrigerant used.

I wonder if you could advise me of the best course of action

Should we apply for retrospective planning permission as we have no proof of planning permission not being required?

Many thanks.

I would appreciate the opportunity to discuss this with a planning officer to try to solve the problem.

Best regards
