2020/0096/L	Camden Town CAAC	05/02/2020 20:46:25	OBJ	<p>We object to the proposed location of the electrical main feed across the primary facade of this listed building in the Conservation Area. The cable should be run at low level across the basement lightwell floor, and then vertically to the ground floor in the corner between the stairs and the front facade.</p> <p>Stringing the cable across the facade in such a prominent location is detrimental to the appearance of the house and therefore neither enhances nor preserves the CA.</p>
