2019/5835/P	Dr Henry Goodfellow	15/02/2020 13:31:32	SUPPRT	<p>I am in full support of this project. Having just been the neighbour of an almost identical building project on Parliament hill, I thought I would add my comments to this project having had firsthand experience of what this would entail. A small 2 floor house next to us was demolished a few years ago and replaced with a much bigger house. I must admit that i was very worried at first with the build mainly due to the disruption it would cause and the obvious fear of changing something that you are use to. To my surprise, I was actually very happy with the final outcome as the new house was designed in such a way that it blended in with the other houses in the area and I think that this new build has actually improved the neighbourhood.</p> <p>Having looked at the plans for this project it seems that the new building will also be more similar to the other houses on the street. The current building is in fact quite ugly especially in comparison to the many beautiful houses on hampstead hill gardens. It appears from the designs that similar to the build next to my house this one also is taking into account the character of the houses in the area and will improve the neighbourhood. I also appreciate that there is more and more need for family homes in the area to continue to maintatin the village like atmosphere of southend green and to help ease the pressure on housing in Camden. I hope that the fear of change that comes with all new builds wont hinder this project from going ahead.</p>
2019/5835/P	Dr Henry Goodfellow	15/02/2020 13:42:45	SUPPRT	<p>I fully support this project. I have just been the neighbour of an almost identical project nearby on Parliament Hill where a two storey house was knockdown and a new 4 storey house was built. I was very apphensive at first with the build mainly due to the disturbance any new biuld brings and as it turns out the unnecessary concerns that we all have when something changes. To my pleasant surprise the new house actually greatly improved the area by creating something that was in keeping with the other houses in the area but adding a new modern twist. I think that this new house was a significant improvement on what was there before and though the during the build there was noise and disturbance it did not cause us any real problems.</p> <p>Having looked at the design for the proposed build on hampstead Hill Gardens it appears that the new build will also be in keeping with the character of the surrounding houses and will improve the neighbourhood. The new build will definitely be a big improvment on the current house which is quite ugly and in great contrast to the surrounding beautiful houses on that road.</p> <p>I also feel that it is beneficial to Camden to have more houses designed for families which will help mainatin the wonderful family freindly atmosphere of the area and help ease housing pressures. In conclusion, I hope that the fear of change wont hinder this project from going ahead</p>
