Informative(s):

- 1 Reasons for granting permission:

The proposed replacement timber sash windows are appropriately detailed for the conservation area, with thermally broken slimline 14mm double glazing, narrow astragal glazing bars, window horns and sliding opening. The replacement windows largely replicate the existing in respect of their design and appearance and will preserve the character and appearance of the Camden Square Conservation Area.

The glazed timber French doors to the rear are generally in keeping with the age and design of the building and are considered to be appropriate for the context. Some of the replacement doors and casement windows will match the style of the existing modern units, and while their design is not authentic to the age of the host building, the impact on the conservation area will be no worse than existing, so on balance the replacements are considered to be acceptable.

The replacement of the front door is acceptable in principle, subject to satisfactory details, which are expected to replicate the existing panelled timber

door in all respects. A condition is proposed to be added to secure these details prior to the replacement of the door.

Due to the nature of the proposed development, there would be no impact upon the residential amenity of neighbouring occupants. No new window openings are proposed.

No objections were received prior making this decision. The planning history of the site has been taken into account when coming to this decision.

Special attention has been paid to the desirability of preserving or enhancing the character or appearance of the Conservation Area, under s.72 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act 2013.

As such, the proposed development is in general accordance with policies A1, D1 and D2 of Camden Local Plan 2017. The development will also accord with the National Planning Policy Framework 2019 and the London Plan 2016.
