2019/5157/P	Chiara Menage	03/03/2020 20:57:15	OBJ	<p>We are residents of Conway street and our property is roughly opposite the proposed site of the air conditioning unit, across a narrow street. We are concerned about the increase in background noise that it will produce, running 24/7 as per the report.</p> <p>We have previously had cause to complain about the significant noise that is produced to the rear of our property in Bromley Place by the air conditioning units attached to the Marie Stopes building, various restaurant fans that back on to the area, and the underground trains that run under the house. The background noise levels in the street are already high from these causes and from road traffic, and we believe yet another persistent noise will be damaging to the well-being of our family and other residents.</p>
