

Secure Storm Fence

BARRIERS AND FENCING PRODUCT INFORMATION

Used and tested by the London Met Police, Live's Secure storm fence is a high security, no-dig, self-supporting system that can withstand vandalism and winds in excess of 100 mph. It is supported through a rigid plastic base bin, which can hold a number of ballasts e.g. sandbags, aggregates or other heavy materials.

The fence is very easy and quick to install. A post is secured easily to each bin using only one bolt. The post is then leveled to stand upright on uneven ground and mesh panels are then hooked onto the top of the post, which allows easy hands-free bolting, it's as simple as that. The bolts are tamper proof and the design makes it extremely difficult to climb with added security of top spikes.

Suitable for

- ✓ Anti-climb deterrent
- ✓ High security areas
- ✓ High wind locations
- ✓ Where the ground cannot be dug

Specification

- Height - 2,400mm
- Width - 3,000mm
- Depth - 550mm
- Load capacity – in excess of 100 mph wind (BS EN 1991)
- Colour – Dark green

Benefits

- No-ground strike, self-supporting
- Resistant to 100mph wind
- Fast and easy to erect and recover
- Anti-tamper fixings
- Anti-climb with spiked tops
- Powder coated
- Base bins can double up as decorative planters
- Mob and vandal tested
