We have so little greenery left on Eton Avenue now because the trees along the street keep getting cut back every time they grow back. We need all the trees that we have. PleAse save this tree from pointless destruction. Thank you

Camden is a heavily polluted borough with many children suffering respiratory diseases on account of heavy traffic. Our trees help, with public transport to make our cities safer for us all. Trees take decades to reach maturity and the effect of concrete all around us lowers our spirits and is bad for our health both physically and psychologically. It takes bravery to listen to others and change our minds. Please show bravery for us all. Many thanks.

With the street's plane trees being chopped back to nothing every two years, there is less and less greenery. Trees are good for the environment- we all know that now. Please, save the tree which we all enjoy in our own private way.
