2020/0915/T	Juliette Meacock	15/03/2020 19:50:36	OBJ	<p>I disagree with this tree being felled to ground level as it's a mature tree with benefits to the environment in general and surrounding area, it's been shown to pose no threat to surrounding property by a tree surgeon and also was deemed safe by Camden Council last year. It takes years for a tree like this to develop and grow and we should be planting trees not felling them in a time of climate crisis! Younger trees sequester much less carbon than mature trees and these mature trees make our cities livable. If all trees in the city that are near a building were removed for their potential threat it would be a totally uninhabitable place.</p> <p>Summers are getting hotter and trees provide very welcome shade so this should be considered in this application. I understand the necessity of removing trees when they are dead/damaged or diseased and pose a threat to life but this isn't the case here. Also it's contradictory to worry about increasing storm winds and then remove a tree ultimately contributing to climate change which in turn makes the weather more extreme!</p>
2020/0915/T	Colin Brown	13/03/2020 15:14:19	COMMNT	I object to the wilful cutting down of trees. There woud have to be an extremely good reason
2020/0915/T	Faye Gordon	15/03/2020 16:40:04	OBJ	<p>I strongly object to the felling of this tree. It has been deemed healthy and assessed by a tree surgeon as posing no risk to any surrounding buildings. I work for a community food growing organisation in Chingford and it is shocking to me, and all of us that at this time this would even be a consideration.</p> <p>We know that trees are crucial to the stability of our atmosphere and climate, not to mention the biodiversity and habitats a mature tree such as this supports. It seems very archaic of Camden council to humour such a petition when councils such as Waltham Forest have implemented pollinator consultations and Hackney Council tree planting initiatives. These are the types of things the council should be focusing on not the destructive whim of an individual.</p> <p>If all trees closed to abodes were removed simply due to their 'potential' threat to property we would all be suffocating, even more than we already are in a heavily polluted city. Please reconsider this proposal to fell a mature tree and destroy the integral habitat and ecosystem it provides from root to leaf!</p>
2020/0915/T	Sara Budd	16/03/2020 18:53:58	OBJ	I strongly object to a mature tree being felled unless it is causing a clear danger, which given the tree in question has a TPO, would require an independent report rather than a quote from someone with a financial interest. IF an independent report confirms that the council employee who inspected the tree when granting the TPO was at fault, then it should be a condition of the removal requires that two trees are planted to replace this beautiful and valuable specimen. In the current climate emergency, every tree counts.
2020/0915/T	Kbroughton	14/03/2020 15:38:46	COMMNT	Mature trees consume huge amounts of CO2 & pollution. in a city that is beyond the legal health limits for pollution & killing 40000 people a year we need every tree to compensate for the particulates & mature specimens especially should be protected. Why destroy one of the few natural defendants of climate change & pollution particularly when this tree has been deemed safe by an arborist.
2020/0915/T	Zuzana Garchet	14/03/2020 09:38:37	PETITNOBJ E	I oppose of this tree being cut down!
2020/0915/T	Zoe	13/03/2020 15:09:48	OBJ	I object to this tree being cut down as it is a healthy, mature tree!

2020/0915/T	Henry Freeman	13/03/2020 11:31:12	OBJ	<p>Dear Tom Little,</p> <p>I arranged for a tree surgeon come to look at this tree earlier today and he has confirmed that the tree is in a good condition, and that it is not dangerous. He told me that a more detailed inspection can be undertaken where a laser is used to check the density of wood in the trunk of the tree. Has that more detailed inspecton been commissioned by John Tims? If so, can you please share that information? If not, then surely the balance of probability is firmly in favour of continuing to protect this tree with a TPO.</p> <p>Best regards,</p> <p>Henry</p>
2020/0915/T	Anthea Gordon	16/03/2020 18:23:26	OBJNOT	<p>Strongly object to this tree being felled. This tree was correctly protected by Camden Council in 2019 after the same applicant asked for it to be cut down - there is no question that the wrong tree was protected! It is also clearly visible by the public from Eton Avenue, Winchester Road, outside the Hampstead Theatre, and from the entrance to the Hall School on Crosssferry Road.</p> <p>We have had an independent tree surgeon look at this tree, and he has confirmed that there are no signs of decay, and that this tree is not dangerous. Trees are a vital part of the character of the conservation area we live in, and protecting them is a key part of Camden's policy to protect our local environment and to reduce our carbon footprint.</p>
2020/0915/T	Ali Khan	16/03/2020 09:15:31	OBJ	<p>On the basis that a TPO was given for this tree a few months ago, and that it sits in a conservation area, due process requires that an engineer's report, and a tree surgeon's report, are both to be submitted detailing the data needed for the Council to make its decision, as listed in Elizabeth Beaumont's email.</p> <p>I trust Camden Council will follow due process, which has been put in place by law to assertively position the long-term benefits for the wider council at a healthy balance against the short-term benefit of individuals. It is incumbent on the Council to protect its corner of the urban environment, for the economic, physical and reputational health of Camden and London.</p>
2020/0915/T	Mr Guy Morris	14/03/2020 11:28:27	OBJ	<p>Please don't allow this to happen. The last thing that London (or the planet) needs is fewer beautiful, old trees.</p>
2020/0915/T	I guiducci	14/03/2020 15:55:56	COMMNT	<p>I object to a safe tree being felled. Read the climate science on Co2 &amp; the benefits of mature trees regarding particulate pollution &amp; climate change. Climate emergency, tree protection emergency is the same thing. Act on it camden council save our trees.</p>
2020/0915/T	Celia White	15/03/2020 20:23:39	OBJ	<p>I strongly object to a healthy, mature tree being felled.</p>
2020/0915/T	Alan Mason	15/03/2020 08:49:12	OBJ	<p>I wish to object to the felling of the tree in question, without independent - and I stress the word "independent" - evidence that it is diseased and a danger to neighbouring properties. Trees, especially mature trees, should only be felled as a last resort. Damaged garden features are easily repaired - hundred year old trees, once gone, are gone for ever.</p>

2020/0915/T	fionnuala Cavanagh	15/03/2020 20:33:57	OBJ	<p>This is a perfectly healthy tree which should not just be chopped down at a whim.</p> <p>Is there no respect for nature and how tirelessly it toils? If not then consider the value they bring - trees are incredibly useful to the environment as well as providing much needed health to our soils.</p> <p>It's disgraceful that this has even been considered.</p>
2020/0915/T	Tom Lock	16/03/2020 10:31:53	OBJ	I object to a healthy and mature tree being felled for no good reason. It's imperative that we keep as many trees alive as possible. They not only contribute to bio-diversity within the eco system, but crucially help to keep carbon levels down and reduce global warming.
2020/0915/T	Zuzana Garchet	14/03/2020 09:37:03	PETITNOBJ E	I oppose of this tree being cut down!
