

# Secure Cycle Store

# Protect·a·cycle®

Certificate No. 899a  
Approved to LPS1175:  
Issue 6 Security Rating 1

Police Preferred Specification  
First and only bicycle  
store to achieve the  
police SBD mark

Designed with all serious cyclists and mountain bikers specifically in mind, the Trimetals **Protect-a-cycle** store boasts all the excellent benefits of our standard Bicycle Store but has many extra features to make it ultra secure.

The Protect-a-cycle is the only bicycle store in the UK to be awarded the coveted Loss Prevention Certification Board and Police Preferred Specification stamps of approval.

To achieve these awards, the Protect-a-cycle was put through a series of rigorous tests to confirm its amazingly tough resistance to vandalism and theft.

This impressive cycle store comes as a package with an integral metal floor and ground anchor, exceptionally strong metal hasps and padlocks, and a heavy-duty security cable for attaching bikes to the store internally.

**Now available  
with a hinged  
front ramp.**

- Maintenance free
- Fire resistant
- Choice of colours

### Magazine tests

"Robust enough to deter anyone breaking in and is a sound investment. It is easy to assemble, unobtrusive and can store bikes and kit with room to spare; this product is Highly Recommended."

"The best reflection of a cyclist's opinion about any product isn't what they say about it or whether they'd happily use it, it's whether or not they'd buy it with their own money. I purchased three Protect-a-cycle bike stores for my own bikes. They're sturdy, weatherproof, secure, and take up little space." - Dan Joyce, Editor.
