

NOTE:
 This survey is of a preliminary nature. The trees were inspected from the ground only on the basis of the Visual Tree Assessment method. No samples were taken for analysis. No decay detection equipment was employed. The survey does not cover the arrangements that may be required in connection with the laying or removal of underground services.
 Branch spread in metres is taken at the four cardinal points to derive an accurate representation of the crown.
 Root Protection Areas (RPA) are derived from stem diameter measured at 1.5 m above adjacent ground level (taken on sloping ground on the upslope side of the tree base).

 Drawing Title: Tree Constraints Plan
 1:200 @ A2
 September 2019

Key:

● High Quality	Category A	○ Crown Spread
● Moderate Quality	Category B	○ Tree Number
● Low Quality	Category C	○ Species
● Trees Unsuitable for Retention	Category U	○ Category

Root Protection Area: Tree Position Approximate (not shown on original survey):
