Subject: Attention: Tree and Landscape Officer

Dear Sir

We have a silver birch on the left side of our front garden looking from the road.

Last year our neighbour's gardener thought it was dying.
This year there is no new budding or growth.
I read these trees can in fact die after 60 years plus.

I would like to cut it down to avoid any danger and replace it.
Please confirm that this is acceptable.

Thank you

Victor Levy
