2020/0050/P	Laura Wong	02/04/2020 18:36:38	INT	<p>Whilst I am not directly objecting to the proposed extension, I do have concerns relating to the fact that the application at no point mentions the impact of the proposed development on [REDACTED]</p> <p>There is a lot of detail relating to the impact on the neighbouring flats at number 4 and number 8, but as a neighbour that will look directly onto the roof of this extension from the kitchen window of flat 6a, the impact does also need to be considered from this angle, and I would like more information about this. My neighbours at number 6 are aware of my concerns, and I am awaiting further details from their architect. Given the current world situation, this information has not been forthcoming, so in light of the fact that comments need to be received this week, I am making these concerns known in this way. I also would like more information as to what is meant by a 'warm' roof, and what the proposed materials are. Again, this is from the perspective of having the view out of the kitchen window of [REDACTED] changed from currently looking down onto a roof terrace, to now looking down onto a roof that is one storey higher than the current terrace below.</p>
