2020/1495/T	Jonathan Byatt	01/04/2020 18:42:46	OBJ	<p>Can the owner developer please co-ordinate with Camden gardening contractors to recycle any flora or fauna impacted by this significant change. Early Warning to Camden of the timetable of works will enable the contractors engaged by Camden to remove the plants at an agreed time and reinstall these to improve the quality of life and reduce pollution on other Camden Estates or parks.</p> <p>In this example the owner plans to remove and destroy two healthy trees which could be added to the Camden total of greenery in the borough. One of them is admitted to be an oak tree with great potential , the other happens to be too close to the property.</p> <p>Camden is looking to celebrate its 100th anniversary by planting 100 trees across estates and the parks. If agreed with the owner, the contractors working for Camden could remove these trees at little or no cost and replant them in healthy spaces to enrich the quality of life in Camden. To merely destroy these trees presupposes there is no value in their reuse. This is plainly untrue and Camden targets of achieving carbon neutrality would be benefited by such an approach. The cost of of such an operation would clearly be offset by the benefits. The loss of a potentially fine oak tree which would provide a legacy for many generations to come as well as the other tree would be a sad loss and completely undermine any aspirations Camden House to protect the environment.</p>
