Thank you Charles,

This seems a more acceptable proposal, although it still leaves a large amount of light pollution from the facade uplighters. Maybe this should be pared further back in intensity and through an earlier cut-off time.

Regards

Pascal

Pascal-

I am still dealing with this application as I still have a few old ones to clear up.

The scheme has been revised following our comments so that the facade wash is reduced to 50%, the uplighters on the sides are omitted and the lighting is turned off at 11pm daily. It is worth pointing out here that the front façade lighting is merely replacing old floodlights that currently exist on a lamp column in the churchyard but have been non-operational for many years.

Accordingly we will be recommending this for approval and reporting it to a forthcoming Members Briefing panel in the light of objections received. I cannot give you a timescale yet as I am still awaiting formal comments from my conservation officer to incorporate into my report.

I hope that helps.

The majority of Council staff are now working at home through remote, secure access to our systems.

Where possible please now communicate with us by telephone or email. We have limited staff in our offices to deal with post, but as most staff are homeworking due to the current situation with COVID-19, electronic communications will mean we can respond quickly.

Dear Charles,

I realise that you have moved to a different role, but I am not sure who is dealing with this application, or whether the coronavirus crisis is having an impact on the planning team.

Can you please update me?

Regards

Pascal Dubois-Pèlerin

Charles,

Any uplighting should be banned as it would add to light pollution, which is already a major problem right across the country. This is well documented, including just recently the following piece of academic research www.sciencedirect.com/science/article/pii/S0006320719307797.

Also the application does not even specify when the lights will come on and off.

As it stands it should therefore be rejected, although with suitable changes, plus additional information, it could be made acceptable.

Regards

Pascal

Pascal-

I am awaiting more information from the vicar, including the proposed illumination levels on the front façade, before I can write this case up for approval. At present, we do not have any objections in principle to the scheme overall. As there are objections from 2 local groups (Church Row Assoc and Hampstead CAAC), we will have to report this case to a Members Briefing panel which meets every Monday. I have no timescales yet in using the decision; however as I am still waiting for info and am on holiday after this week for 3 weeks, it is unlikely to be written up now until when I return in early March.

If you wish to comment on this application, please do so asap either online or by an email to our generic mailbox.

thanks

Good morning Charles,

The consultation end date for this application is long past but I have only just heard about it.

I am minded to oppose it as yet another source of light pollution, both for local residents and visitors, and for London as a whole.

Before I have a chat with the vicar may I ask when you are due to issue your report?

Regards

Pascal Dubois-Pèlerin
