2020/1746/T		22/04/2020 08:59:55	COMMNT	<p>Any felling of trees is not a good decision to make building can be repaired in months trees take many years to grow again</p> <p>Trees are not valued by some however I trust Camden will look seriously at why people apply to have trees felled stating damage to property when the reason is otherwise such as light access. I am not saying this is the case here but needs to be considered</p>
2020/1746/T		22/04/2020 09:52:54	OBJ	<p>Refuse this application .</p> <p>One of the great joys of Camden is that although it is a busy metropolitan area it has an abundance of trees. Everyone now knows that trees are not only of aesthetic use, thus contributing to our mental well being, they are also vital tools in improving the air quality in the city and also an important weapon in the fight against climate change .</p> <p>To its credit Camden has a vigorous policy of tree planting in the borough , however there is little point in planting new trees to increase the tree population if constantly existing trees are being felled .</p> <p>Of course there are circumstances in which a tree should be felled ,if it is diseased or its roots are seriously endangering a structure are two obvious ones .</p> <p>Other kinds of objections can be easily remedied by judicious and expert pruning . ,</p> <p>However every attempt must be made to preserve Camden¿s existing stock where possible in both private and public space .</p> <p>Thus I would argue that in this case the reasons for felling are not convincing and that the application for felling should be refused with a recommendation for professional pruning .</p>
