The majority of Council staff are now working at home through remote, secure access to our systems.

Where possible please now communicate with us by telephone or email. We have limited staff in our offices to deal with post, but as most staff are homeworking due to the current situation with COVID-19, electronic communications will mean we can respond quickly.

Dear David

The air quality assessment had decided not to include existing residents? That cannot be right.

It is also not currently clear why pollution in the area has not been contained in this highly polluted residential area

(although the above might explain that, and given that you would know, I think, of the effect on people of pollution, and the numbers effected)

by connecting the existing flats to the (combined heat and power) energy centre that is there, instead of new flats, which would add to the pollution through not taking the opportunity of reducing it, in this serious situation.

Yours sincerely

Ps another issue is that even if an error was made on the first application, it doesn't mean that the same error must be made on a different application.

On Friday, March 13, 2020, Michelle Rispin <michelle.rispin@googlemail.com> wrote:

Dear David

The change is that the new application requests to use the CHP energy. This is something a key pollution expert has said should not happen, because of the increase in pollution. There seems to be a dispute regarding that then potentially. The pertinent details regarding the CHP have now been requested.

Best wishes

M Rispin

Dear Michelle,

All of the information is online. Where there is no further information on energy, then there are no changes from the approved application.

regards,

David

Subject:

The Planning Forum for the area has requested from the Council (and also the CHP energy, via the Council) the necessary details regarding the CHP energy centre request, which is involved in this planning application.

The information should be received shortly, because the response to this (Environmental Information Regulation) request of the Planning Forum is required asap by law, and they have also been informed about the current planning application.

This planning application has not been well publicised.

Please wait for the response for this pertinent information in the Environmental Information Regulation request, before any decision on this planning application, and the planning department will be informed regarding this asap.
