Dear Mr Mouyiaris

Re: 69 Kentish Town Road

Further to my letter to you dated 14th April 2020 confirming my appointment for the review of the basement I am writing to reconfirm the scope of my appointment.

I will carry out a review of the design of the basement permanent and temporary works, once the permanent works have been approved by Building Control. I will then undertake inspections to approve the critical elements of the installation of the temporary works and monitor its progress and performance. I would subsequently inspect the installation of the permanent works associated with the basement. At each stage I would report on any concerns I have to you and the contractor so that these can be addressed. This role will continue for the duration of the basement construction.

Yours sincerely,

Steven R Brunswick
