

Elevation Proposed Front Garden

Elevation Existing Front Garden (undertaken 18th January 2019)

Design notes:

From the road the overall appearance of the house and drive will be little changed.

The main car driveway has been widened by 1500mm and the twin swing gates replaced with a sliding version. The gates are now raised approx 250mm to 1800mm.

The wooden low wall is replaced with a brick one constructed of bricks of the same appearance as the house and road. The hedge is changed from Privet to Prunus lucitanicus but remains the same height.

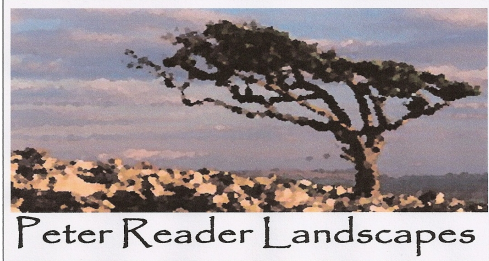

The pedestrian gateway remains the same apart from the raising of the fence and gates to 1800mm to match the driveway.
